Rittal – The System.
Faster – better – everywhere.

Rittal Service
Tailored solutions for individual applications – all from one partner.

This is how “Rittal – The System” supports your operations and your business. From the planning phase to building and integration and into your business operations, Rittal is there every step, every day.

With a total of 63 subsidiaries, more than 250 service partners and over 1,000 service technicians worldwide, we guarantee regional proximity and fast response times. Plus, our individual maintenance contracts ensure predictable costs when service is needed. An international presence along with regional proximity, ultimate service quality paired with a transparent budget – this is Rittal Service.
Rittal Service
Preserve the value of your investments.

Plan

For data center solutions…

From Edge micro data center installations to large colocation facilities with thousands of racks, Rittal products are scalable to fit the infrastructure needs of data managers and customers. Our global team of engineers, sales and training staff can partner with you to create ship-loadable solutions that can be installed in uncontrolled environments or hyperscale data centers. We can help you manage power efficiency, cooling solutions, security and data support. Rittal reinforces your goal of full performance with attentive service.
Every industrial environment offers a unique set of challenges, from fluctuating temperatures to caustic chemicals, particulates and even high power loads. Rittal has seen it all, in every industry, around the globe. Rittal industrial solutions follow a systematic plan, beginning with analysis of your current processes and procedures. Then, potential cost and time savings are reviewed to evaluate data consistency and technology efficiency. This assures our customers that their design will meet industrial challenges now, and in the future.
From basic product installation to full start-up and commissioning, Rittal will work with your requirements and help ensure you meet your project objectives. You can rely on our team of highly qualified service technicians for proper installation and commissioning of our products and systems.

- Installation
  Installation/assembly of individual devices or whole systems

- Commissioning
  May include visual/mechanical checks, unit startup, functional testing, and informal user training

- Training
  On-site training or at the Rittal training center
Rittal’s value begins with the quality of our products, but even the best products need to be maintained to ensure proper operation and long life. Rittal’s maintenance services allow you to get expert support straight from the manufacturer. Our highly qualified technicians are prepared with the right tools and the right parts to quickly repair a problem or just keep your equipment up and running. Efficient work means less time out of service and less cost to you in the long run.

Preventative maintenance does maximize the life of your Rittal system, but when a repair is needed, Rittal provides added value with worldwide availability of individual parts. Our professional spare parts management and service contract options can be matched to your requirements. Parts are available in a timely manner, anytime, anywhere. Worldwide deliveries via our international spare parts logistics and multiple stocking locations, together with the local stocks held by our subsidiaries, guarantee fast and reliable availability.
Added value through worldwide availability of individual parts.

Rittal guarantees worldwide availability of spare parts and service contracts aligned with your requirements. Choose from a variety of spare parts options, including:

- **Customer-specific spare parts.**
  Customer-specific spare parts are components that can be individually defined and held in stock for those customers with an individual service contract.

- **Standard spare parts.**
  Standard spare parts are components that we use on a daily basis for our own series production.

**Your benefits:**

- Stock of customer-specific components can be maintained for individual service contracts
- Multiple stocking locations ensure fast and reliable spare parts availability
- Approved, original spare parts direct from Rittal
Rittal service plans are as flexible and individual as your requirements, offering tailored service agreements that guarantee all the benefits of lifecycle management for long-term security. You can select from four packaged service plans or customize one to fit your needs.

Our plans provide more security for your Rittal products. As you preserve the value of your equipment, you can also receive a guaranteed response time for a technician on-site. Spare parts are stocked, and costs are fixed and established. Extended warranties are also available for up to five years.

Warranty

Extensions maximize profitability.

Rittal products are always a good choice. From harsh industrial environments to pristine data centers, they already demonstrate their high quality and reliability in daily operation. Regular preventive maintenance contributes to a longer product service life and thus further increases the profitability of your equipment.

Conditions for warranty extension:

- Optional warranty extension with BASIC and COMFORT service contracts
- Individual agreement on warranty extension with a CUSTOMIZED service contract
- Standard extension with ADVANCED and FULL service contracts

Your benefits:

- No additional costs for technician travel
- Spare parts supplied and installed free of charge
- Cost transparency for up to 5 years
